INDEX OF SUBJECT MATTER

Bold faced figures refer to abstracts, light faced figures to pages.

(a)—Periodontal Histo-pathology, 1930

Alveolo-dental articulation, 97-118.
Alveolo-dental periosteum, 86-113.

Cementum, 83-113; resorption of, 85-113, 86-113.

Enamel, 84-113.
Epithelial attachment, 89-115, 90-115, 94-117.

Gingivae, innervation of, 91-116; hornification of, 83-116; morphology of, 95-117; characteristics of, 96-117.

Leucocytes of gingival origin in the mouth, 98-119.

Nasmyth's membrane, 87-114, 89-115.

Periodontal fibers, 99-119.

Tooth eruption, 88-115.
Tumors of the jaws, 92-116.

(b)—Periodontal Bacteriology

Character of exudate in gingivitis, 28-122.

Streptococci associated with periodontoclasia, 27-122.

(c)—Other Laboratory Researches

Atrophy of alveolar bone, 32-123.

Blood chemistry in relation to periodontia, 29-122.

Calcium content of the teeth, 23-120.
Calcium and phosphorus equilibrium in the blood, 24-121.

Experimental gingivitis and pyorrhea, 26-121.

Food factors in prevention and control of dental diseases, 28-122.

Gas metabolism in paradentosis, 25-121.
Gingival capillaroskopie, 21-120.

Periodontal disease in dogs, 27-122.
Pus cells, staining of, 31-123.

Salivary calculus, 30-122, 33-124.

Tooth growth in experimental scurvy, 22-120.

(d)—Clinical Etiology

Acid-base equilibrium, disturbance of, 152-130, 153-130, 159-133, 164-134.
Arthritic diathesis, 147-128, 167-135, 170-136.

Bridge abutments, changes in tissues surrounding, 146-128.

Calculus, subgingival, 139-126; salivary, 171-136.
Crowns, effects of, 149-129.

Dental caries and pyorrhea, related etiology, 137-124, 138-125, 153-130, 159-133.

Diabetes, 140-127, 174-137.
Diet, 154-131.

Endocrine glands, disturbance of, 136-125, 137-125, 147-128, 163-134, 169-135.

Food impaction, 148-129.

Gingivitis and pyorrhea, differentiation, 139-126.

Ionic dissociation, 152-130.

Leucocytes, toxicity of, 142-127.

Occlusion, relation of, 143-127, 145-128, 150-129, 155-131, 156-131, 157-132, 158-132, 162-133, 166-134, 168-135, 172-137.
Osteitis, dental, 160-133.

Pararizoclasia, 141-127.
Pregnancy, 151-129.

Relation between dental and general health, 138-125, 161-133, 165-134, 170-136, 172-137.
Researches on, 135-125.
Resorption, 157-132, 161-133, 169-135, 173-137.

Salivary, calculus, 171-136.
Senility, 165-134, 167-135.

Theories of, 144-127.

(e)—Symptomatology and Diagnosis

Agranulocytic angina, 77-139.
Alveolysis, localized, 81-140.

Cysts, unusual, 84-141.
Capillaries, gingival, 96-145.

Diagnosis, differential, 92-143, 97-145; value of interdental papillae in, 100-146; syphilitic lesions, 101-146.

Elephantiasis gingivae, 76-139, 104-147.
Epulis of the jaws, 99-146.

Gingivitis, an infectious entity, 88-142, 89-143; foreign body, 95-144; stomatitis and, 103-147.

Periodontal pockets, epithelium, relationship to, 85-142, 87-142.
Periodontitis, tubercular, 98-145.
Pregnancy, oral complications, 79-140.
Pyorrhea, alveolaris, 80-140, 83-141, 86-142, 93-144, 94-144.

Resorption, root, 91-143.
Rickets, 82-141.

Trigeminal neuralgia, 105-148.

(f)—Treatment

Anti-virus, 139-155.
Auto-anti-virus, 136-154.

Changes in periodontium due to surgical diathermy, 131-152.
Constitutional, 137-154.
Curettage, 143-156.

Drugs, use of in dentistry, 125-149; for packs in pockets, 132-153; subgingival therapy, 145-157; ammoniacal Ag No_3, 148-138.

Early treatment, advantage of, 141-155.

Occlusal adjustment in, 146-157, 148-158.
Operative dentistry, relation to, 133-153.

Oral sepsis, relation to pregnancy and effect upon, 129-151.

Permanence of, 144-157.
Pockets, periodontal, elimination by cautery, 124-149, 128-151; with packs, 132-153; with sodium sulphide, 126-150; by resection, 127-150.
Pregnancy, in relation to, 129-151.

Sodium ricinoleate in, 135-154.
Spirocheticides in, 147-158.
Symptomatic, 137-154.

Tartar formation, prevention of, 128-151.

Ultra-violet therapy, 138-154, 140-155.

Vaccine therapy, 147-158.

(g)—Home Care and Prophylaxis

Gingival massage, 26-159, 27-160, 29-160.

Brushing the teeth, 26-159, 28-160.

(h)—Vincent's Infection

Etiology of,
Direct and indirect factors in, 76-161, 79-163, relation of pyorrhea to, 87-166.

Diagnosis of,
Difficulty of, 83-164, importance of differential, 88-166, laboratory, 93-168, 96-168, Microscopic examination and subjective symptoms in, 82-163, smearing and staining technic, 80-163, symptoms in, 85-165, two types of Vincent's infection, 84-165.

Treatment of,
Adam's combination in, 81-163, bismuth sodium tartrate, 92-167, chromic acid, 7%, 74-161, 76-162, 90-167, copper sulphate, 74-161, 75-161, diet in, 82-163, evaluation of various drugs in, 77-162, extensive review of literature on, 78-162, 83-164, for children, 86-165, massage as a prophylactic against, 91-167, neo-arsphenamin in glycerine, 85-165, research in, 75-161, salvarsan, 73-161, serious aspects of, 73-161, simplicity of, 74-161, tincture of green soap, 82-163.

(i)—Miscellaneous

Economics of periodontia, 28-172.

Nomenclature, 20-170, 25-171.

Practitioner, general, preparation for periodontia, 33-173, 36-174, 37-174.
Prevention, of periodontoclasia, 29-172, 30-172, of metastatic abscesses, 18-170.

Radio talks on pyorrhea, 34-174.
Relation of, dentistry to tuberculosis, 23-171, dentition and fever, 24-171, occlusion to biting pressure, 26-171, periodontoclasia to public health, 22-171.
Review of literature on periodontoclasia, 27-172.
Resorption, root, its significance, 39-172.

Standardizing studies and examinations of school children, 21-170.
Status of periodontia, in dental education, 19-170, in dental practice, 31-173.
Stereoscopic dental radiography, 32-173.
